**EXHIBIT A, STATEMENT OF WORK
(GRANT APPLICATION)**

ELECTRONIC
RECORDING
TECHNOLOGY
BOARD

Grant Application

Updated 9-24-21

Background

In the state of Colorado, a one-dollar per document technology fee was implemented in the early 2000's to aid County offices across the state in funding technological advancements in recording. As a result, Colorado was the first multi-jurisdictional state in the nation to adopt e-Recording across the state.

In the spring of 2014, a working group made up of real estate, lending, legal professionals as well as counties conducted a statewide needs assessment and a request for information to evaluate the state of recording systems in Colorado.

In the spring of 2016, legislation was passed, and this board and a funding structure were created from Senate Bill 16-115.

Our Vision

To create, support, and maintain a statewide land records environment that promotes accessibility and consistency for the public in an efficient and user-friendly manner.

Our Mission

To develop, maintain, improve, replace, or preserve land records systems in our state.

Business Purpose

The business purpose of the board is to develop and modernize electronic filing systems throughout the state as defined in 24-21-402 (2).

Our Core Goals (24-21-403 (1))

- Assure the security, accuracy, and preservation of public records required to be maintained by a Clerk and Recorder.
- Maintain the privacy of personal identifying information, online public access to which is not necessary to the proper functioning of land title records or other public records required to be maintained by a clerk and recorder.
- Assure that the sequence in which documents are received by a clerk and recorder is accurately reflected to the greatest extent practicable.
- Provide for online public access to public documents while maintaining the privacy of personal identifying information when applicable.
- Assure that electronic filing systems used in different counties are similar so as to facilitate the submission and searching of electronic records.

Our Objectives

1. Develop a strategic plan that incorporates the core goals and establish the administration of the Electronic Recording Technology Fund and Board.
2. Determine functionality standards for an electronic filing system that supports the core goals.

What is the age of your current software? What is the age of the equipment (hardware) for which you are applying? What is the expected life of the software and hardware?

Software was installed in 2007. Software receives quarterly updates and releases. Current County server is 2 years old. However, the GovOS purchase will change the entire recording environment for Pueblo County by providing a hosted Data Center with more security, backups, power protections and multiple cyber security measures.

What is the condition of your current software? What is the condition of the equipment (hardware) for which you are applying?

Excellent. Current County server is in good condition, however the strategic technology policy of Pueblo County is moving toward cloud based apps for any new County application.

Who is your current vendor? What product and version do you currently use?

Tyler Technologies, currently running version 2022.1.24

What is your current annual payment to your vendor and how is it calculated?

Annual Maintenance - \$80,790.25

How and what kind of hosting is done with any parts of your recording system?

None, currently. Requesting funding to move to a Hosted environment, which includes Federal-grade security, encryption, and data replication. Moving forward, Pueblo County would no longer need to purchase, maintain, or support their servers, as it will be on a cloud based system.

What percentage of your land documents are accessible online? What will the percentage be if this grant application is approved?

Approximately 30% Land documents accessible online would increase approximately 10% with the acquisition of this new system. Our current system will not accommodate the inclusion of the entire digitization project we are currently working on. Ultimately, when the cloud system is up

Grant Information

Why are you applying for grant funds?

To upgrade the software/hardware to the much more secure cloud based environment and increase the accessibility of the historical documents online to the public.

Amount of grant request (no funding requests involving expenditures past June 30, 2026).
\$321,904

What do you want to use the grant money for? Break out the expenses and include bids, invoices, or proposals with your request. What specific equipment and software do you want to purchase?

We'd like to update existing system to offer more flexibility in searching for document images online, as well as provide opportunity to securely purchase document copies online, apply for marriage applications, register for Property Alert, record documents through the online portal, provide access to our historical indexes, as well as move to hosted environment as noted above.

If you are requesting grant funding for digitization and indexing, please provide a general description of the documents to be digitized and/or indexed, the approximate date ranges, the total number of pages or documents, and an estimate of the percent of documents that are not related to interests in real property. If there are documents not listed in the Board's Policy Governing Grants for Digitization and Indexing, as examples of real property documents but the Clerk believes are related to interests in real property, please provide an explanation of why the documents are related to real property. Attach supporting bids if applicable. Bids should include the number of pages and/or documents to be digitized and/or indexed. If you are requesting grant funding to improve the security of your county's general information technology systems, please describe generally the security measures to be undertaken with grant funds and explain why/how the improvement is necessary to improve the security of your electronic filing system.

A flip to cloud based software means we would be hosted in a state-of-the-art secure datacenter. Our records would no longer be stored on the County's servers. Being hosted would provide more security measures that the County currently does not have in place.

Additional Hosting Benefits:

- Federal-grade security, encryption, and data replication.
- Automatic software updates to maximize user experience.
- Data stored in state-of-the-art secure datacenters.

If the grant is for temporary staff, what specific project will the staff be working on? (Please attach a Statement of Work).

Not applicable.

How do you plan to segregate grant funds from county funds?

The Pueblo County Budget Office will create a separate line item in the County budget for the grant funds.

Will any monies from your technology fund be used for the purpose(s) contained in the grant request? If yes, how much?

No

If no, explain the plans for the use of your technology fund.

We have this money earmarked for specific projects.

Will this be (or was this) a competitive bid process (RFP) or an upgrade to an existing system?

Not a competitive bid process, this would be an upgrade from our existing system.

Will the grant award increase your annual maintenance costs? If so, do you have a long-term plan to budget for the increase?

Yes.

Maintenance cost will be covered till 2026. By adding self-service, recording access and marriage license access this will create new revenue streams to the County from the sale of those documents. At that time of the annual maintenance costs we will add to our County budget or apply for grant money.

Describe how the funds will be used to achieve the stated business purpose and core goals.

A) To assure the security, accuracy and preservation of public records

Cyber security is an increasing concern for Pueblo County. We would feel more comfortable

B) To maintain the privacy of personal identifying information, online access.
