Subject: Internet/Email Voting

Importance: High

The Honorable Wayne Williams;

We are writing to voice our opposition to the implementation of an internet/email voting system.

As we have seen recently, hacking is becoming more prevalent, and at a time when we should be securing our voting rights where only eligible voters can cast a vote, this is absolutely the worst time to consider further encouraging voter fraud.

Please reconsider your position to endorse this proposed practice and stand with concerned citizens across Colorado in opposing the proposal to turn our voting over to internet/email versions.

Regards,

Hugo Chavez-Rey
