Subject: No To Internet Voting

Hello-I'm writing to strongly encourage a No vote on the internet voting question you're considering. It's my understanding that you track yes comments and no comments so put me under the No column.

I'd be glad to elaborate, but suffice it to say that it's already too easy for people to be duplicitous in voting practices. If someone needs to provide an ID to buy a beer or deposit waste at a landfill, it's not too much to ask for the same information when a person votes.

Thank you for your time.

John Knauf-Edwards, Colorado
