**Subject:** Voting my email/web base is INSANE!

I am writing to object to any efforts to conduct elections via email or web based systems. There is already far too much tampering that occurs with electronic voting machines, which I believe should be banned as well. It is well established that there would be NO WAY for such a thing to be secure, reliable, private or verifiable.

Our elections are the only time the public gets a say in our form of government. It is not a difficult task to take paper ballots and hand count them. NO ELECTRONIC VOTING and NO INTERNET BASED VOTING!!

Elections need to be transparent and verifiable.
