Subject: Please DO NOT go forward with internet/e-mail voting

Importance: High

SoS Wayne Williams,

You presented yourself as a defender of the values that underlie our country during your campaign. One of those CRITICAL VALUES is INTEGRITY...which applies not only to people, but to processes as well – especially the VOTING process. I have worked in IT for over 30 years. I know, first hand, that security for online voting CANNOT be assured. Even a modestly dedicated effort could completely corrupt even a well-designed voting system. The best you could every claim is...“well, I believe the results are fairly accurate; at least within 10%!” But since most elections are determined by much less than a 20pt swing, online voting essentially takes the vote away from the people and hands it over to whomever has the better hackers.

PLEASE DO NOT GO FORWARD WITH ONLINE/e-MAIL VOTING!
