Subject: OPPOSE internet voting!

I urge you to oppose internet voting in Colorado for many reasons! One of the many reasons why we citizens of Colorado should not venture into the world of the internet for one of the most valued aspects of our political system is that email and web-based voting is far from secure, reliable, private, or verifiable.

I have learned a valuable lesson in my life: once you say something, you can't "un-say" it. The same applies with voting into effect any new processes, even when they are supposedly for "progress." Once you vote to implement a new process, you can't "un-vote" or "un-implement" it, even once you come to the realization that it was a huge mistake. But you can always vote to NOT implement a new process and NOT regret your decision!

Sincerely,

Zoe Ann Smith
