**Subject:** Prevent Internet Voting HB15-1130

Dear Secretary of State Williams,

It is of tantamount importance that you reject any measures to allow for internet voting. The hacks we hear of every week should be enough evidence that the capabilities just do not currently exist to keep such an important system secure and prevent tampering.

Personally, I've had my information accessed through Anthem and Home Depot in the past few months.

For the few people who would be affected as military in hostile environments, amending the proposed bill to properly accommodate ONLY them, and in a secure method, is feasible and desired.

Please do not expand internet voting through these proposed rules.

Thank you.

Sincerely,  
Kathleen L Sullivan, PE
