**Subject:** comments on proposed election rule changes

re Proposed change to rule 2.14.1

Deleting the language as proposed appears to leave county officials without guidance regarding when they can destroy paper records once digital images have been entered into SCORE. Unless appropriate guidance is provided elsewhere and readily found, the absence of clear guidance on retention will place a burden on county clerks and storage space.

general: all rules should be finalized and published at least six months prior to any election so the county clerks, election judges, etc., are not faced with continually changing rules. any additional rule changes should only apply to elections more than six months into the future.
