Subject: Suggestions regarding identification changes for Notaries.

After reading the new change, I remembered something I read that said comments would be received up to the final date. Here goes.

1. 24-21-504(2) CRS: Family Connections

This piece is very redundant. The second section says same thing as the first one, just more specific on spousal type connections. Part two should be dropped in the interest of simplicity.

2. 24-21-507(2) CRS: Suitable identification

Again this is pretty redundant. Mentions a photo only once. With most contracts and other documents of specific identification, at least one of the primary presented identification must include a photo. The photo can be supported by other documents, but there has to be a photo. I think this does bear as it is related to a relationship to legal documents.

Thanks. Clint Boehler,
A Huerfano County Notary
