---

I believe that the current campaign finance laws in our country allowing unlimited financial involvement of corporations and wealthy individuals has ushered in the end of Democracy and the beginning of Oligarchy in America, providing an unprecedented avenue for corruption and the strangling of everything we value about this once great country. Almost every intactable problem we have at a state and national level can be traced to money in politics. Many believe there is no way to turn it back. It is probably the worst thing that has ever happened to us, a loss so great we do not even know how to grieve it. Anything the state of Colorado can do to mitigate the problems created by the purchase of politicians leading to corporate ownership of our government would be greatly appreciated. Thank you for soliciting my feedback.
