Thank you for hosting the recent webinar. I was impressed with Chris Beall's professionalism.

As noted by other attendees, I am in agreement that a full forensic audit is necessary, in order to demonstrate to the Colorado citizens, that our election processes are truly the "gold standard".

The Cyber Symposium scheduled for August 10-12 is expected to be viewed by millions. Cyber forensic experts are expected to attend which will either validate or negate the findings that will be presented. We shall see. I will watch for your input regarding Colorado outcomes that will be shown during the symposium.

Respectfully,
Brenda Zech
