---

Hello, please accept my comments for the proposed rule changes:

20.7.2 (d): This is unnecessary and impractical, drop boxes are located outside and are subject to harsh weather including, rain, snow, wind and extreme temperatures, what happens when moisture gets under the seal and makes it fall off or not even stick in the first place? What do we do when someone messes with it or tears it off for fun? We would only know if someone was sitting watching the cameras 24/7.

20.11.1 (f): How are we supposed to check that the video surveillance is operational and running as it should on Sunday? Is someone supposed to come to the office to verify that it is operational? Our employees live no closer than 20 miles from the office, is there an alternative solution? For a system that is supposed to be closed and unable to access, it wouldn't look very good if we were trying to access it remotely.

7.17.3 (a): The ballot style naming contradicts the proposed rules, the crossed out "one or two digit" district number needs fixed because it contradicts the numbering example at the bottom at the section.

Thanks,

Mindy Dutro
